

AXSTEC Steps

Sliding Automatic

The **AXSTEC** automatic sliding step is an electrical operated sliding step. The automatic electric step can be operated by door contact switch, or a driver operated switch.

The design in Aluminium, plastic corners and rubber front edge gives it a modern appearance fitting in well with the design of today's vehicles.

The step has a complete different construction compared to other products in the market. The closed sliding mechanism is build to keep dirt far away from the critical parts.

AXSTEC Automatic Step Features:

- Tested in real live
- Flexifit mounting brackets.
- Closed design to keep dirt far away from critical sliding parts.
- Electrically operated using a double gear arm mechanism and 12V motor.
