

HANDI DOOR OPENERS

Automatic Door Openers

RDO & HDO

*Automatic
opening of
vertical and
horizontal
doors*

The Handi HDO is a unique electrically operated automatic hatch door opener. It is specifically designed to open the heavy hatch doors of VW T6, Mercedes Vito and Fiat Scudo and is as such very strong.

The Handi RDO kit opens rear swing doors on various models of full size vans. Two identical motor operators opens the swing doors independently.

RDO & HDO

Handi Hatch Door Opener - HDO

The hatch door opener gives you full functionality without taking up much space. This is especially an advantage in smaller cars - e.g. a mpv.

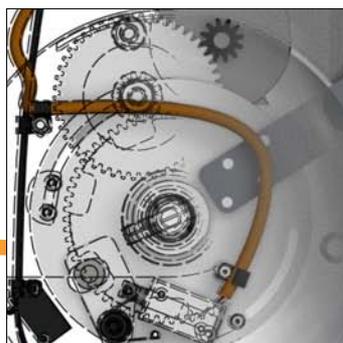

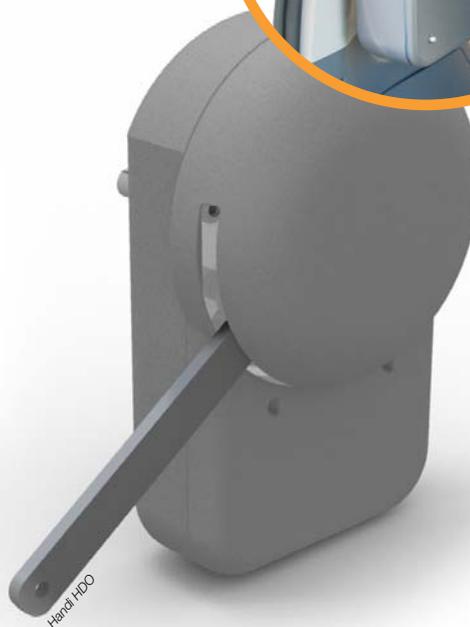

It is mounted on the car wall with a special bracket. This leaves room on the floor for further adaptation or equipment.

Features

- Plug and play: Once connected it is fully functional. You'll only need to do adjustments at closed and open position.
- Fully integrated with Handi Lift; lift and door opener works with one remote.
- It is electrical – as opposed to pneumatic. This makes it indifferent of the weather and you won't need a compressor.
- You can still use the hatch door manually.
- It consists of only one unit. This makes it possible to install in smaller cars.

Good vision - With the right construction and in combination with the right lift, you'll have good view through the back window.

Handi Rear Door Opener - RDO

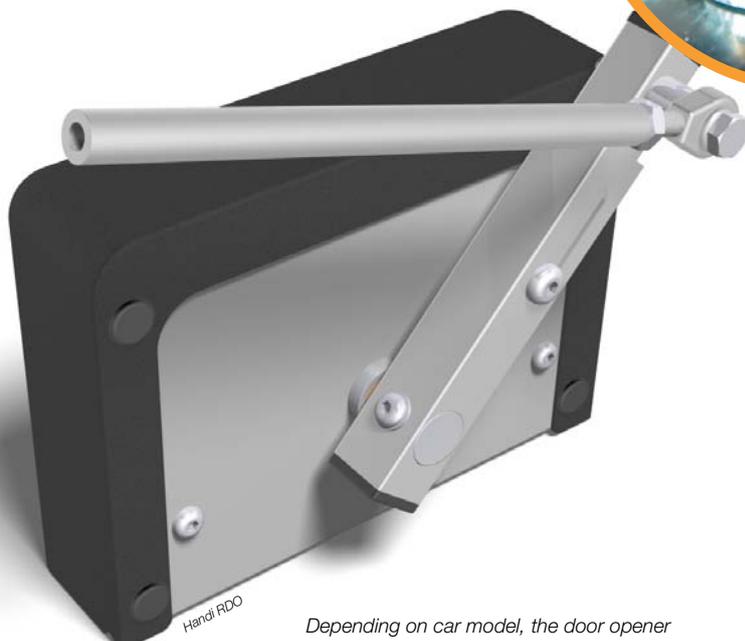

This RDO is a high quality product with unique features.

We have succeeded in making a rear door opener that is in many respects very simple. This goes for mounting, connecting and using.

You'll spend fewer man-hours, and the customer has a more durable solution.

Features

- Plug and play: Simply plug it in and everything is activated.
- The two motors are identical - they do not mirror each other. This makes mounting fast and easy with no risk of making mistakes.
- Non-mechanical switches: the in and out stop switches work by magnetism. This means no wear and no need for adjustments on a regular basis.
- The moving arm is easily adjustable. You'll be able to fit this door opener into most car models.
- One unit remote control: The door opener is connected to Handi Lift, so you'll need only one remote.

The switches work by magnetism, this is a unique feature. This means that there is no physical contact between the moving parts and the electrical detection. In effect, you have no wear and therefore rarely need of adjustments.

Depending on car model, the door opener can be placed horizontally or vertically. Either way, it has full functionality.

HANDI DOOR OPENERS

Automatic Door Openers

RDO & HDO

Plug 'n Play

Both door openers are plug and play along with the lift. Once connected, all functions are combined in one remote control.

The RDO and HDO kits are complete with wiring loom for the Handi Lift Mobility series.

Insert the plug into the socket on the lift, and the door openers immediately works together with the lift operations, no matter if the lift is operated by a cable pendant or a wireless remote control unit.

Brackets

RDO: We provide brackets for most van models.

HDO: The HDO comes with a universal bracket. Please note: special brackets for Mercedes Vito/Viano and VW T6.

Please remember to order the correct brackets when placing your order.

TECHNICAL SPECIFICATIONS HDO

Power supply	VDC	12
Current consumption	A	25
Weight	kg	6,3
Height	mm	300
Width	mm	180
Depth	mm	120

TECHNICAL SPECIFICATIONS RDO

Power supply	VDC	12
Current consumption	A	15
Weight, one moter	kg	4,8
Total weight	kg	11,8
Height	mm	194
Width	mm	260
