HATCH DOOR OPENER

**Plug 'n play -  
Fully integrated with  
Handi Lift™ vehicle  
wheelchair lift.  
Works with only one  
remote.**

The hatch door opener gives full functionality, without taking up much space.

It is specifically designed to open the heavy hatch doors of VW T5, Mercedes Viano and Fiat Scudo and is as such very strong - so is the price.

## HATCH DOOR OPENER

### Handi HDO™ - Hatch Door Opener

The HDO is an electrically operated, silent, maintenance free and easy to mount hatch door opener. The hatch door opener gives you full functionality without taking up much space.

This is especially an advantage in smaller vehicles - e.g. a mpv. It is mounted on the vehicle wall with a special bracket. This leaves room on the floor for further adaptation or equipment, and further on ensures good vision.

### Features

- No power? No worries. The hatch door can still be used manually, and if the power fails, the original dampers of the hatch door will prevent the hatch from lowering in any inappropriate situation.
- The only adjustments needed are the open and closed positions of the hatch.
- Tested at 10.000 cycles, this HDO is tested to the limit, to ensure a life time product.
- Plug 'n play: Simply plug it in and everything is activated.

### Mounting

The HDO comes with a universal bracket. Please note; special brackets apply for Mercedes Vito, VW T5 and Fiat Scudo.

Please remember to order the brackets when placing your order. If the vehicle doesn't have a factory fitted hatch release, we can supply the necessary kit.

### TECHNICAL SPECIFICATIONS

Power supply	VDC	12
Current consumption	A	25
Weight	kg	6,3
Height	mm	300
Width	mm	180
Depth	mm	120
